

GROWPLUGS 104

BY QUICK PLUG

Quickplug's stabilized grow plugs offer consistent moisture balance, excellent root development, and a clean, organic start for seeds and cuttings.

GUARENTEED REWETTING

Stimulate root development by letting the hydrophilic plugs become dry and rehydrate quickly and evenly.

RHP-CERTIFIED MEDIA

Premium coir & peat components meet strict RHP standards for professional cultivation.

FASTER GROWTH

WITH HIGH AIR CAPACITY

Stabilized high air capacity at 14% gives support to vital and healthy roots.

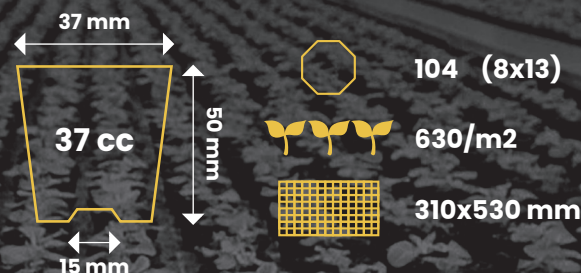

PERFECT FIT, EASY HANDLING

Rounded shape supports easy handling and automatisisation. Preformed holes fit perfectly for healthy cuttings and seeds.

ANALYSIS

Coco (RHP Coir Fine Optima) **90%**
Peat (RHP Baltic Peat 6/12) **10%**

Moisture content 77-88%
 Organic matter at 600 °C 88-96%
 Bulk density 90-115 kg/m³
 Shrinkage 25-35%
 Pores 85-95%
 water rate of organic matter* 5,6-8,4 gr
 * Pressure height -10cm

CHEMICAL ANALYSIS		TARGET
EC	mS/cm	1.0
pH		5.6

WATERING

Just water and drain out the excess water. The plug will automatically regulate the optimum moisture level.

SEEDS

Place the seed approximately 3 mm deep into the center hole of each plug.

CLONES

Insert the stem of the cutting fully into the pre-formed hole. Ensure firm contact between stem and plug.

Quickplug is global specialist in bonded substrate plugs for propagation in commercial horticulture & floriculture. Marketleader in rooting and seedling plug media for greenhouses, hydroponics, aquaponics.
